Since 1973

Emergency Vehicle & Dump Truck Manufacturing
Complex Assembly
Fabricating
Hydraulics
Welding
Wire Harnesses
Bend Forming
Plasma Cutting

QUALITY	ON TIME DELIVERY	CUSTOMER SERVICE	CHARITABLE GIVING	PRICE

Why Choose Us?

Hastreiter Industries started in 1988 originally as UTM, when Ken Hastreiter engineered a way to make a 4 axis part on a 2 axis lathe. During machining, the part was fixtured on a bolt and nut combination to create two additional axes to make a helix cut. But, Hastreiter didn't stop there, as this creativity and focus is still creating solutions for customers today. From becoming a recognized leader in trade magazines to the AS9100 certification, Hastreiter now provides a variety of machining and fabricating services across the U.S.

Thoughts Behind The Logo.

Our philosophy goes beyond us. The logo combines a lower case "h" and "i" put together to make a capital H. This creates a visual reminder that without our customers, vendors, local schools, nonprofits, employees, and general community, we do not exist. Together we become stronger and bigger. For that reason we equally invest in our team through technology, equipment & training, but also in the community. This includes the C2 Makerspace launched by Hastreiter in collaboration with the community. All this creates a world class ecosystem of manufacturing unmatched in few locations.

HASTREITER INDUSTRIES FIVE COMPANY PILLARS

- Aerospace, Defense & Space
- Energy (POWER GENERATION)
- Industrial Equipment
- Medical Industry
- Other Industries
